Subject

A

ABORIGINES, diets, fat content of animal foods, 684
ACROSOMAL MEMBRANE, boar sperm, lipid composition, 566
ACYL-CoA SYNTHETASE, hepatocyte, rat, 571
  rat, testicular, long chain, HPLC measurement, 11
ADIPOCYTES, effect of age and size on glycerolipid biosynthesis, 460
ADIPOSE TISSUE, rat, glycerolipid biosynthesis, 460
  brown, mice, obese vs lean, in situ and grafts, fatty acids, 195
ADRENAL GLAND, rat oxidative desaturation of fatty acids, effects of epinephrine, 401
AGE, effect on α-tocopherol content of rat brain, 786
  effect on glycerolipid biosynthesis in rat adipocytes, 460
AGING, rat, quantitation of dolichyl phosphate and dolichol, 353
ALDEHYDES, saturated, reaction with thiobarbituric acid, 537
ALK-1-ENYL ETHER, oxidation, effect of unsaturated fatty acids, 648
ALKYLGLYCEROL MONOOXYGENASE, rat, liver, microsomes, phospholipid requirements, 191
5,6α-EPOXY-5α-CHOLESTA-3β-OL, adsorption and excretion in rat, 744
14α-METHYLSTEROL, cucumber, 491
α-TOCOPHEROL, content of rat brain, effect of diet and age, 786
  influence on autoxidation of methyl linoleate, 255
  lung tissue, rat, rabbit, mouse, 769
  subcellular distribution in chick liver fed β-carotene, 164
ALVEOLAR MACROPHAGES, guinea pig, PC and PS, transfer of arachidonate, 623
AMINO ACIDS, crosslinking reactions of malondialdehyde, 6
ANESTHESIA, mechanism, potency of four octane derivatives, 405
ANIMAL FOODS, fatty acid composition, Australian animals, 684
ANTIDIURETIC HORMONE, toad, effect of phospholipids, 596
ANTINEOPLASTIC ACTIVITY, ether lipid derivatives, 301
AORTA, COMPOSITION, monkey, effects of dietary fiber, 338
APIS MELLIFERA, selective sterol transfer, 97
APOVITELLENIN I, avian egg-yolk apoprotein, complexes with lecithin, 127
ARACHIDONATE, BIOSYNTHESIS, blockage by dexamethasone, 212
ARACHIDONIC ACID, dietary, rat, measurement of incorporation into tissue lipids, 21
  effect on ADH activity of toad bladder, 596
  human polymorphonuclear and mononuclear cell content, effect of allergic rhinitis and/or asthma, 17
  PC and PS, rat alveolar macrophages, 623
ARTICHOKE, tubers, microsomes, laurate hydroxylase, 780
ASTHMA, human, alteration of arachidonic acid content of polymorphonuclear and mononuclear cells, 17
ATTAGENUS, see dermestid beetle, 662
AUSTRALIAN ABORIGINES, diets, fat content of animal foods, 684
AUTOXIDATION, cholesterol, oxysterol evaluation by GC and TLC-FID, 383
  methyl linoleate, peroxidizing effect of α-tocopherol, 255
  methyl linolenate, prostaglandin-like substances, 553
  radioactive labeled linoleate, distribution in rat tissue, 150
AZASERINE, pancreatic carcinogen, dietary fats and foci growth, 281

B

BACTERIA, Francisella, phospholipids, fatty acid composition, 669
BANANA, sterol content, 494
BEETLE, conversion of stigmasterol to cholestanol, 639
  dermestid, tetradecadienoic acid synthesis, 662
  exoskeleton, triglycerides, fatty acid profile, GLC, 434
β-CAROTENE, dietary, subcellular distribution in chick liver, 164
β-D-ACETYLGLUCOSAMINIDASE, activity in rat hepatocytes, effect of viscosity, 629
β-D-GALACTOSIDASE, activity in rat hepatocytes, effect of viscosity, 629
BGM CELL, triacylglycerol metabolism, effect of paramyxovirus, 608
BILE ACID, cholesterol synthesis, enterocytes, 759
  hyodeoxycholic acid, effect on gallstone dissolution, 575
BLADDER, toad, ADH activity and phospholipid effect, 596
BLOOD, rat, vitamin A and E distribution, 465
BLOOD PRESSURE, effect of diet on hypertensive rats, 753
BOAR, sperm, acrosome membrane, lipid composition, 566
BOVINE, brain, cerebrosides, HPLC, 710
BRAIN, bovine, diacylglycerol kinase, properties, 206
  lipids, rat, fatty acid composition, effect of linolenate, 697
  mouse, glucosylceramide, conduritol B epoxide, 702
  rat, α-tocopherol content, effect of diet and age, 786
BRITTLE STARS, fatty acid profile,430

C

CACTUS, phytosterols, effects on host plant utilization by *Drosophila*, 92
CALORIES, dietary restriction, influence on cancer, 272
CANCER, dietary effect of fish oils, 731
  influence of dietary fat and caloric restriction, 272
  rat pancreatic, dietary effect on growth of azaserine-induced foci, 281
CANINE, intestinal HMG-CoA reductase activity, diurnal rhythm, 420
CARDANOL, in cashew nutshell liquid, separation from other phenols, 241
CARDIOLIPIN, fatty acid composition of phospholipids in mitochondria, 677
CARYOPHYLLACEAE, Δ^7-sterols in leaves, RPLC, GC, 754
CASHEW, nutshell liquid, separation of phenols by liquid chromatography, 241
CERAMIDE, rat, small intestinal mucosa, distribution, 112
CEREBROSIDES, separation and analysis by HPLC, 710
CHICK, liver, β-carotene, α-tocopherol, retinol, subcellular distribution, 164
CHLOROPROPANEDIOL, goat milk, GC and stereospecific analysis, 315
CHLOROPROPANEDIOL DIESTERS, molecular species in goat milk fat, 183
CHLORPHENTERMINE, effect on choline incorporation in lung phospholipids, 230
CHOLELITHIASIS, effect of bile acids in prairie dog, 575
CHOLESTANOL, metabolism in Mexican bean beetle, 639
  effect upon sterols in rabbit tissues, 738
CHOLESTANOLOSIS, rabbit brain, effect of sterols, 738
CHOLESTEROL, effect upon liver metabolism and function in rat, 475
  effect upon preparation of multilamellar vesicles, 691
  effect upon sterols in rabbit tissue, 738
  effect upon tissue lipids and growth in rats, 748
  hepatic synthesis in mouse, effect of phenylpiperidine diones, 617
  metabolism in rats treated with polychlorinated biphenyls, effects of clofibrate, 159
  synthesis, human small intestine, bile acids, 759
  tallow, autoxidation, oxysterol evaluation by GC and TLC-FID, 383
CHOLESTEROL ACYLTRANSFERASE, effect of purines, lecithin metabolism, 531
CHOLESTEROL GALLSTONES, prairie dog, effect of bile acid on dissolution, 575
CHOLESTERYL ESTER HYDROLASE, rat liver, 503
  rat liver lysosomes, 481
CHOLESTYRAMINE, effect upon sterols in rabbit tissue, 738
CHOLINE, incorporation in lung phospholipids, effect on chlorphentermine, 230
CHOLINE PHOSPHOLIPIDS, preparation of multilamellar vesicles, 691
CHOLINEPHOSPHOTRANSFERASE, rabbit, lung microsomes, 498
CHONDRILLA, see sponge, 470
CHROMAFFIN CELLS, bovine, plasma membrane lipids, 417
CHROMATOGRAPHY, COLUMN, isolation of pyrophosphatidic acid, 666
CHROMATOGRAPHY, GAS, fatty acid esters of chloropropane-

diol, 309
fatty acids, 1,3 dioxane derivatives, location of double bonds, 175
mass spectrometry, *t*-butyldimethylsilyl esters of fatty acids, 247
oxysterols from autoxidation of tallow cholesterol, 383
CHROMATOGRAPHY, GAS LIQUID, 4-desmethylsterols of Caryophyllaceae, 754
fatty acid methyl esters, beetle exoskeleton, 434
fatty acid methyl esters, hepatic and liver lipids, 475
fatty acid methyl esters, MDCK cells, 447
fatty acid methyl esters, measurement in rat tissue lipids, 21
fatty acid methyl esters, phospholipids, 17
fatty acid methyl esters, rat liver and hepatocytes, 454
fatty acid profile of seeds, 486
fatty acids in human tissues, 543
fatty acids in rat plasma and liver, 652
fatty acids of Australian animal tissues, 684
fatty acids of bacterial phospholipids, 669
fatty acids of boar sperm membranes, 566
fatty acids of pig testis and cod liver oil, GC-MS, 657
fatty acids of rat brain phospholipids, 697
fatty acids of sea urchin, 558
isolation of pyrophosphatidic acid, 666
mass, fatty acid profile, marine invertebrates, 430
open-tubular, fatty acid methyl esters, 430
sterols, cucumber, 491
sterols, soybean and squash, 48
CHROMATOGRAPHY, GEL, autoxidation products of methyl linolenate, 553
CHROMATOGRAPHY, HIGH PERFORMANCE LIQUID, analysis of neutral glycolipids, 112
autoxidation products of methyl linolenate, 553
chiral phase, separation of monoacylglycerol enantiomers, 413
diacylglycerols, 634
ion exchange, separation of gangliosides, 267
measurement of acyl-CoA synthetases, 11
polyenoic molecular species, quantitative analysis, 356
reversed phase, steroids in *Manduca sexta*, 76
separation and analysis of cerebrosides, 710
separation of heart phospholipids, 239
CHROMATOGRAPHY, HIGH PERFORMANCE THIN LAYER, purification and identification of glycosphingolipids and ceramide, 112
purification of glycosphingolipids, 107
CHROMATOGRAPHY, LIQUID, lecithin-protein complexes, 127
phenols in cashew nutshell liquid, 241
phospholipase C, purification, 776
CHROMATOGRAPHY, RPLC, 4-desmethylsterols of Caryophyllaceae, 754
CHROMATOGRAPHY, THIN LAYER, autoxidation products of methyl linolenate, 553
triglycerides, phospholipids, 447
using flame ionization detection, oxysterols from autoxidation of tallow cholesterol, 383
CHRONIC DISEASES, effects of dietary fish oils, 731
CHYLOMICRONS, ruminants, hydrolysis by lipoprotein lipase, 252
CINNAMIC 4-HYDROXYLASE, plant microsomes, 2,4-D, clofibrate, 780
CIS-5-OLEFINIC ACIDS, sea urchin, GLC, structural analysis, 558
CIS-3,5-TETRADECADIENOIC ACID, synthesis of, 662
CIS-VACCENIC ACID, identification in mango pulp by chromatographic, spectrometric and chemical methods, 388
CLOFIBRATE, effect on cholesterol metabolism in PCB-treated rats, 159
effect on ketogenesis in rat hepatocytes, 508
effect on laurate ω-hydroxylase activity, 780
CLOFIBRIC ACID, effect on diacyl glycerophosphocholine composition, 634
COD, liver oil, pyrrolidide and picolinyl derivatives of fatty acids, GC-MS, 657
muscle, glyceryl ethers, GC-MS, 518
COHYDROLASE, activity in mouse, glucosylceramide in mouse, 702
COLON, tumorigenesis, effects of dietary components on pathology, 289
CONDURITOL B EPOXIDE, effect upon glucosylceramide in mouse, 702
CRINOIDEA, see sea lilies, 430
CUCUMBER, 14α-methylsterol content, 491
CUCUMIS, see cucumber, 491
CUCURBITACEAE, sterols, configurations at C-24, 39
sterols, content and composition, 39
sterols, GC-MS, 515
CUPHEA LUTEA, seeds, lipid biosynthesis, labeling studies with acetate and mevalonate, 143
CYCLIC AMP, hamster fibroblasts, triacylglycerols, 525
CYTIDINE MONOPHOSPHATE, synthesis of phosphatidylcholine in rabbit lung microsomes, 498

D

2,4-D, effect on laurate ω-hydroxylase activity, 780
Δ^6 DESATURASE, effect of malonyl-CoA, rat liver microsomes, 721
rat, liver, microsomes, effect of estradiol and temperature, 440
Δ^9 DESATURATION, rat liver, microsomes, fatty acid composition, 425
Δ^7-STEROLS, presence in leaves of Caryophyllaceae, RPLC, GC, 754
DERMESTID BEETLE, tetradecadienoic acid synthesis, 662
DESATURASE, activity in protozoan epimastigotes, 718
activity in rat liver mitochondria, effect of growth hormone, 677
4-DESMETHYLSTEROLS, in leaves of Caryophyllaceae, 754
DEUTERIUM LABELING, fatty acids, GC-MS of *t*-butyldimethylsilyl esters, 247
DEXAMETHASONE, effects on arachidonate biosynthesis, 212
DIACYL GLYCEROPHOSPHOCHOLINE, rat hepatocytes, effect of clofibric acid, 634
DIACYLGLYCEROL ACYLTRANSFERASE, hamster fibroblasts, effect of fatty acids, 525
DIACYLGLYCEROL KINASE, bovine brain, properties, 206
DIENOIC FATTY ACIDS, effect on Δ^9 desaturation, rat, 425
DIET, Australian Aborigines, fat content of animal foods, 684
effect of n-3 and n-6 fatty acids on phospholipids, GLC, 652
effect of vegetable fats on hypertensive rats, 753
effect on fatty acid composition of rat liver and hepatocytes, 454
effect upon α-tocopherol content of rat brain, 786
rat, effect of cholesterol and cholate, 475
DIETHYLHEXYL PHTHALATE, effect on laurate ω-hydroxylase activity, 780
DIMETHYLSTEROLS, Cucurbitaceae, GC-MS, 515
DOCOSAHEXAENOIC ACID, acylation into human neutrophil phospholipids, 324
DOLICHOL, rat organs, quantitation during aging, 353
DOLICHYL PHOSPHATE, rat organs, quantitation during aging, 353
DOUBLE BONDS, fatty acids, location by gas chromatography, 175
DROSOPHILA, cactophilic, effect of phytosterol on host plant utilization, 92
DRUGS, development, squalane-2,3-epoxide cyclase as a model, 31

E

ECHINOIDEA, see sea urchin, 558
EGG YOLK, avian apoprotein apovitellenin I, complexes with lecithin, 127
EGGS, *Manduca sexta*, the fate of radiolabeled steroids, 76
ELECTRON DONORS, hemoglobin peroxidase activity, 792
ELECTROPHORESIS DISC GEL, phospholipase C, purification, 776
ENANTIOMERS, MONOACYLGLYCEROL, separation by HPLC, 413
ENTEROCYTES, cholesterol synthesis, small intestine of human, 759
EPIDIDYMAL SPERM, lipid composition of plasma and acrosomal membrane, 566

EPILACHNA, see beetle, 639
EPIMASTIGOTES, desaturation of fatty acids in Trypanosoma, 718
EPINEPHRINE, effects on fatty acid desaturation in rat adrenal gland, 401
EPITHELIAL CELLS, cholesterol synthesis, small intestine of human, 759
ERGOSTEROL, as a fungal growth factor, 89
ERUCIC ACID, metabolism in perfused rat liver, influence of dietary fat, 395
ESSENTIAL FATTY ACIDS, deficiency, effect upon brain lipids of rat, 697
dietary effect on linoleic acid retention in rats, 121
effect on cardiovascular responses to stress in the rat, 139
relationship to vitamin E deficiency, 603
ESTRADIOL, effect on Δ^6 desaturase, rat liver, 440
ETHYL HEXADEC-1-ENYL ETHER, oxidation, plasmalogen model, 648
EXOSKELETON, beetle, triglycerides, fatty acid profile, GLC, 434
EXTRACELLULAR FLUID VISCOSITY, effect on ganglioside composition, hepatocytes, 629

F

FAT, milk, globules, method of isolation, 170
FAT, DIETARY, influence on metabolism of erucic acid in rat liver, 395
FAT, POLYUNSATURATED, dietary effects on rat mammary tumorigenesis, 285
FAT DIGESTION, human intestine, 444
FATS, effects on rat pancreatic carcinogenesis, 281
FATTY ACID, composition of mitochondrial membranes, dietary lipid effects, 315
esters of chloropropanediol, GC and stereospecific analysis, 309
FATTY ACID METHYL ESTERS, rat tissue, gas liquid chromatographic measurement, 21
FATTY ACID PROFILE, Australian animals, 684
bacterial phospholipids, GC, 669
beetle, exoskeleton, GLC, 434
GLC, sea urchin, 558
hepatic and plasma lipids of rat, 475
MDCK cells, 447
phospholipids of rat brain, 697
phospholipids of rat liver mitochondria, 677
phospholipids of rat plasma and liver, GLC, 652
plasma and acrosomal membrane of boar sperm, 566
rat hepatocytes, effect of diet, 508
rat, liver and brain, vitamin E deficiency, 603
rat, liver and hepatocytes, 454
see lilies and brittle stars, 430
Wrightia seeds, 486
FATTY ACIDS, Atlantic salmon, hatchery-fed vs wild, 117
desaturation, dietary effects of triolein and sunflower oil, 220
desaturation in protozoan epimastigotes, 718
developing mustard seeds, elongation, 347
1,3-dioxane derivatives, location of double bonds by gas chromatography, 175
distribution in human tissues, GC, 543
hamster fibroblasts, cyclic AMP, triacylglycerols, 525
incorporation and metabolism in glycerolipids, 447
iso- and anteiso-, determination by mass spectrometry, 362
metabolism, acyl:CoA synthetase, rat hepatocyte, 571
oxidative desaturation, rat adrenal gland, effects of epinephrine, 401
phospholipids, concentrations in polymorphonuclear and mononuclear cells, effect of allergic rhinitis and/or asthma, 17
plasma steryl esters, composition in patients with phytosterolemia, 371
rat brown adipose tissue, obese vs lean, 195
rat microsomes, dietary effect, 425
rat tissue, effects of linoleic acid–rich total parenteral nutrition, 132
saturated and unsaturated, deuterium-labeled, GC-MS of *t*-butyldimethylsilyl esters, 247
synthesis, stimulation by 4β-phorbol-12-myristate-13-acetate, 366
FATTY ACIDS, ESSENTIAL, rat and rainbow trout, liver cells, desaturation and chain elongation, 202
relationship to vitamin E deficiency, 603
FATTY ACYL-CoA SYNTHETASE, rat liver, activity, specificity, size, effects of Triton X-100, 328
FATTY ACYLS, distribution in phospholipids, effect of growth hormone, 677
FATTY LIVER, induction in hypertensive rats, 475
FECAL EXCRETION, rat, 5,6α-epoxy-5α-cholesta-3β-ol, 744
FIBER, dietary, effects on lipids and aortic composition of vervet monkeys, 338
FIBROBLASTS, hamster, diacylglycerol acyltransferase, 525
FISH OIL FATTY ACIDS, effect on phospholipids of plasma and liver, 652
FISH OILS, effect on ketogenesis in rat hepatocytes, 508
effect upon chronic diseases, cancer, 731
FLUORESCENCE POLARIZATION, mobility of acyl groups in vesicles, 691
FRANCISELLA, see bacteria, 669

G

GALLSTONES, prairie dog, effect of bile acid on dissolution, 575
GANGLIOSIDE, composition in rat liver, extracellular fluid viscosity, 629
separation by ion exchange HPLC, 267
GLUTATHIONE PEROXIDASE, activity in lung tissue, rat, rabbit, 769
GLYCEROLIPID, biosynthesis, rat adipocytes, effect of age, 460
MDCK cells, incorporation of 18:3 fatty acids, 447
GLYCEROPHOSPHOCHOLINE, DIACYL, biosynthesis of dipalmitoyl species in rabbit alveolar macrophages, 155
GLYCERYL ETHERS, cod muscle, GC-MS, 518
GLYCOSPHINGOLIPIDS, metabolism, reticulum sarcoma, vitamin E, 643
monkey, distribution along small and large intestinal mucosa, 107
rat, small intestinal mucosa distribution, 112
GROWTH, rat, effect of histidine excess, 748
GROWTH HORMONE, effect on phospholipids in rat liver mitochondria, 677
GUINEA PIG, alveolar macrophages, PC and PS, transfer of arachidonate, 623
lung tissue, lipid peroxide levels, 769
GYNOSTEMMA, see Cucurbitaceae, 515

H

HAMSTER, fibroblasts, diacylglycerol acyltransferase, 525
lung tissue, lipid peroxide levels, 769
HEART, human, phospholipids, separation by HPLC, 239
rat, triacylglycerol hydrolase, stimulation by phosphatidylethanolamine and lysophosphatidylethanolamine, 1
HEMOGLOBIN, peroxidase activity, lipid hydroperoxides, 792
HEPATOCYTES, ganglioside composition, rat, extracellular fluid viscosity, 629
plasma membrane, rat, acyl CoA synthetase, 571
rat, arachidonate biosynthesis, blockage by dexamethasone, 212
rat, diacyl glycerophosphocholine, 634
rat, fatty acid composition, effect of nutrition, 454
rat, ketogenesis, effect of diet, 508
rat liver, hydrolase and lipase enzymes, 503
HEPATOMA, subcellular membranes, comparison of lipids, 292
HEPATOMA, CELLS, rat, arachidonate biosynthesis, blockage by dexamethasone, 212
HEXADECENOIC ACID, distribution in human tissue, GC, 543
HIGH ENERGY INTERMEDIATES, use in the study of sterol biosynthesis in higher plants, 52
HISTIDINE, effect upon tissue lipids and growth in rats, 748
HMG-CoA REDUCTASE, activity, effects of oxysterols, 27
canine intestinal, diurnal rhythm of activity, 420
HONEY BEE, selective sterol transfer, 97
HUMAN, adsorption and distribution of octadecenoic acid, 589
intestine, cholesterol synthesis, bile acids, 759
intestine, liquid crystalline phase, fat digestion, 444

plasma, effect of purines on lecithin, 531
tissue lipids, 543
HYDROPEROXIDES, determination, hemoglobin peroxidase, 792
HYDROXYMETHYLGLUTARYL-CoA REDUCTASE, role in phytosterol synthesis, 82
HYMENOPTERA, selective sterol transfer in the honey bee, 97
HYODEOXYCHOLIC ACID, effect on cholesterol gallstones in prairie dog, 575
HYPERLIPIDEMIA, mouse, effect of phenyl-piperidine diones, 617
HYPERTENSION, rat, fatty liver, 475
HYPERTENSIVE RAT, effect of diet on blood pressure, 753
HYPOCHOLESTEROLEMIA, rat, effect of rice bran oil, 715

I

INFLUENZA, SWINE, vaccine, lipid content, 342
INSULIN, RELEASE, lipid metabolism, dietary effects of triolein and sunflower oil, 220
INTESTINAL ABSORPTION, rat, 5,6α-epoxy-5α-cholesta-3β-ol, 744
INTESTINE, human, liquid crystalline phase, fat digestion, 444
ION TRAP DETECTOR, GC-MS, phenolic acetates, isopropylidines, 518
ISOMERS, GEOMETRICAL, linoleic acid, synthesis, 178
ISOPROPYLIDINES, glycerol ethers, GC-MS, 518
ISORICINOLEIC ACID, content in seeds, 486

J

JERUSALEM ARTICHOKE, tubers, microsomes, laurate hydroxylase, 780

K

K3T3 RETICULUM SARCOMA CELLS, mouse, glycosphingolipids, vitamin E, 643
KETOGENESIS, rat hepatocytes, effect of diet, 508
KIDNEY, phospholipid fatty acids in hypertensive rats, 753
rat, polyphosphoinositide pools, effects of pre- and post-weaning undernutrition, 226

L

LARD, dietary effects on mammary tumorigenesis in rats, 275
LAURATE ω-HYDROXYLASE, effect of clofibrate and 2,4-D, 780
LEAVES, Caryophyllaceae, Δ⁷-sterol content, RPLC, GC, 754
LECITHIN, complexes with apovitellenin I, 127
rat and human plasma, effect of purines, 531
LECITHIN REVERSE MICELLES, water pool, spectral analysis, 764
LEPTINOTARSA, see beetle, 434
LINOLEATE, radioactive labeled, autoxidized, distribution in rat tissue, 150
LINOLEATE, METHYL, autoxidation, peroxidizing effect of α-tocopherol, 255
secondary oxidation products, chemical ionization-mass spectrometric data, 333
LINOLEIC ACID, effect on oxidation of alk-1-enyl ether, 648
enzymic oxidation, 261
geometrical isomers, synthesis, 178
retention in rat lipid, dietary effect of essential fatty acids, 121
LINOLENATE, METHYL, secondary oxidation products, chemical ionization-mass spectrometric data, 333
LINOLENIC ACID, effect on brain lipids of rat, 697
effect on oxidation of alk-1-enyl ether, 648
PC and PS, rat alveolar macrophages, 623
LIPASE, LIPOPROTEIN, ruminants, hydrolysis of VLDL and chylomicrons, 252
LIPIDS, Atlantic salmon, hatchery-fed vs wild, 117
autoxidation products, distribution in rat tissue, 150
biosynthesis in *Cuphea lutea*, labeling studies, 143
bovine adrenal chromaffin cells, membrane composition, 417
distribution of metabolites of erucic acid in rat liver, influence of dietary fat, 395
ether derivatives, antineoplastic activity in vitro, 301
liver and hepatoma, subcellular membranes, comparison of lipids, 292
mango pulp, identification of *cis*-vaccenic acid by chromatographic, spectrometric and chemical methods, 388
monkey, effects of dietary fiber, 338
rat carcass, linoleic acid content, effect of dietary essential fatty acids, 121
serum, abnormalities in Reye's syndrome, 378
LIPOPROTEIN, effect of rice bran oil in rat, 715
lipids, action of phenyl-piperidine diones, mouse, 617
lipids, octadecenoic acid distribution in human, 589
LIPOPROTEINS, LOW DENSITY, partial specific volume, preferential hydration, 235
LIPOPROTEINS, VERY LOW DENSITY, ruminants, hydrolysis by lipoprotein lipase, 252
LIVER, chick, β-carotene, α-tocopherol, retinol, subcellular distribution, 164
hepatocytes, rat and rainbow trout, essential fatty acids, desaturation and chain elongation, 202
microsomes, rat, Δ⁶ desaturase, effect of malonyl-CoA, 721
mouse, glucosylceramide, conduritol B epoxide, 702
rabbit, phospholipase C, platelet-activating factor, 776
rat, cholesteryl ester hydrolase, triglyceride lipase, 503
rat, effect of cholesterol and cholate, 475
rat, fatty acid composition, effect of nutrition, 454
rat, ganglioside composition, extracellular fluid viscosity, 629
rat, hepatocytes, diacyl glycerophosphocholine, 634
rat, ketogenesis, effect of diet, 508
rat, lysosomes, cholesteryl ester hydrolase, 481
rat, microsomes, Δ⁶ desaturase, effect of estradiol and temperature, 440
rat, microsomes, Δ⁹ desaturation, fatty acid composition, 425
rat, microsomes, phospholipid stimulation of alkylglycerol monooxygenase, 191
rat, phospholipid composition, effect of diet, GLC, 652
rat, vitamin A and E distribution, 465
rat lipid, effect of histidine and cholesterol, 748
rat mitochondria, effect of growth hormone on phospholipids, 677
subcellular membranes, comparison of lipids, 292
LUNG, mice, surfactant phospholipids, 548
rabbit, microsomes, cholinephosphotransferase, 498
rabbit, synthesis of PC and PG, palmitic acid, 724
LYSOPHOSPHATIDYLETHANOLAMINE, stimulation of rat heart triacylglycerol hydrolase, 1
LYSOSOMES, phospholipase C, PAF hydrolysis, 776
rat, liver, cholesteryl ester hydrolase, 481

M

MACROPHAGES, alveolar, guinea pig, PC and PS, transfer of arachidonate, 623
rabbit alveolar, biosynthesis of lipids, 155
MALONDIALDEHYDE, amino acid crosslinking reactions, 6
metabolism, toxicity, 305
MALONYL-CoA, effect upon Δ⁶ desaturase in rat liver, 721
MANDUCA SEXTA, ovaries and eggs, the fate of radiolabeled steroids, 76
MANGO, pulp lipids, identification of *cis*-vaccenic acid by chromatographic, spectrometric and chemical methods, 388
MARINE LIPIDS, dietary effect, chronic diseases, cancer, 731
MARINE SPONGE, isolation of 5,9-hexadecadienoic acid, 470
MASS SPECTROMETRY, tandem fast atom bombardment, PC, PS, 580
MDCK CELLS, metabolism, incorporation of 18:3 fatty acids, 447
MEMBRANE, PLASMA, bovine chromaffin cells, lipid composition, 417
MEMBRANES, SUBCELLULAR, liver and hepatoma, comparison of lipids, 292
METHYL LINOLENATE, autoxidation, prostaglandin-like substances, 553
METHYLNAPHTHALENE, effect on surfactant phospholipids, 548
MEVALONIC ACID, regulation by hydroxymethylglutaryl-CoA reductase, 82

MICE, lung, surfactant phospholipids, 548
obese vs lean, brown adipose tissue, fatty acids, 195
MICELLES, water content of, spectral analysis, 764
MICROSCOPY, polarizing, gel and micellar phases of human intestine, 444
MICROSOMES, laurate hydroxylase, clofibrate, 2,4-D, 780
liver, rat, alkylglycerol monooxygenase, stimulation by phospholipids, 191
rabbit, lung, cholinephosphotransferase, 498
MICROSOMES, rat liver, Δ^6 desaturase, effect of estradiol and temperature, 440
rat liver, Δ^6 desaturase, effect of malonyl-CoA, 721
rat liver, Δ^9desaturation, fatty acid composition, 425
MILK, fat globules, method of isolation, 170
goat, fatty acid esters of chloropropanediol, stereospecific analysis, 309
MILK FAT, goat, chloropropanediol diesters and triacylglycerols, comparative study of molecular species, 183
MITOCHONDRIA, membrane, monkey, fatty acid composition, effects of dietary lipids, 315
phospholipase C, PAF hydrolysis, 776
rat liver, effect of growth hormone on phospholipids, 677
MONKEY, intestinal mucosa, distribution of glycosphingolipids, 107
marmoset, mitochondrial membrane fatty acid composition, effects of dietary lipids, 315
vervet, lipids and aortic composition, effects of dietary fiber, 338
MONOACYLGLYCEROL, enantiomers, separation by HPLC, 413
MONOHEXOSYLCERAMIDES, separation by HPLC, 710
MORRIS HEPATOMA 7777, rat, sphingomyelin, 529
MOUSE, hypolipidemic activity of phenyl-piperidine diones, 617
K3T3 reticulum sarcoma cells, glycosphingolipids, vitamin E, 643
liver and brain, glucosylceramide, conduritol B epoxide, 702
lung tissue, lipid peroxide levels, 769
triacylglycerol metabolism, effect of paramyxovirus, 608
MUCOSA, monkey intestinal, distribution of glycosphingolipids, 107
MULTILAMELLAR VESICLES, use of choline phospholipids, 691
MUSA, see banana, 494
MUSCLE, cod, glyceryl ethers, GC-MS, 518
MUSHROOMS, linoleic acid, enzymic oxidation, 261
pyrophosphatidic acid content, 666
MUSTARD *(SINAPIS ALBA)*, developing seeds, elongation of fatty acids, 347
MUTAGENS, FOOD, toxicity to colonic epithelium, 289

N

NEUTROPHILS, human, incorporation of docosahexaenoic acid, 324
NONPROTEIN SULFHYDRYLS, lung tissue, rat, rabbit, mouse, 769
NUCLEIC ACID BASES, malondialdehyde crosslinking reactions with amino acids, 6

O

OCTADECADIENOIC ACID, distribution in human tissue, GC, 543
OCTADECENOIC ACID, distribution in human tissue, GC, 543
distribution into plasma and lipoprotein of human, 589
OCTANE, derivatives, potency and mechanism as anesthetics, 405
ω-HYDROXYLASE, activity in plants, effect of 2,4-D and clofibrate, 780
OPHIUROIDEA, see brittle stars, 430
OVARIES, *Manduca sexta*, the fate of radiolabeled steroids, 76
OXIDATION, plasmalogen model, effect of unsaturated esters, 648
OXYSTEROLS, chemical synthesis, biosynthesis, biological activities, 27
from autoxidation of tallow cholesterol, evaluation by GC and TLC-FID, 383
intestinal adsorption and fecal excretion in rat, 744

P

P-450 CYTOCHROMES, plant microsomes, 2,4-D, clofibrate, 780
PALMITIC ACID, synthesis of PC and PG in rabbit lung, 724
PANCREAS, rat, azaserine-induced foci, dietary effects of fats, 281
PARAMYXOVIRUS, effect on triacylglycerol metabolism in mice and BGM cells, 608
PEROXIDASE, activity in hemoglobin, lipid hydroperoxides, 792
PEROXIDE, levels in lung tissue, mouse, rabbit, rat, guinea pig, 769
PHENOLIC ACETATES, GC-MS, 518
PHENOLS, in cashew liquid, separation by liquid chromatography, 241
PHENYLHYDRAZINE, effect upon cohydralase activity, glucosylceramide content in rat liver and brain, 702
PHENYL-PIPERIDINE DIONES, hypolipidemic action in mouse, 617
PHEROMONE, dermestid beetle, synthesis of tetradecadienoic acid, 662
PHOSPHATIDYLCHOLINE, mass spectrometry with fast atom bombardment, 580
preparation of multilamellar vesicles, 691
rat alveolar macrophages, fatty acid transfer, 623
synthesis in rabbit lung, palmitic acid, 724
synthesis in rabbit lung microsomes, 498
PHOSPHATIDYLETHANOLAMINE, stimulation of rat heart triacylglycerol hydrolase, 1
PHOSPHATIDYLGLYCEROL, synthesis in rabbit lung, palmitic acid, 724
PHOSPHATIDYLSERINE, mass spectrometry with fast atom bombardment, 580
rat alveolar macrophages, fatty acid transfer, 623,
PHOSPHOLIPASE C, platelet-activating factor, rabbit liver, 776
PHOSPHOLIPIDS, bacteria, fatty acid composition, GC, NMR, 669
composition in rat liver mitochondria, effect of growth hormone, 677
effect upon ADH activity in toad, 596
fatty acid composition, rat liver and plasma, diet effects, 652
human heart, separation by HPLC, 239
levels in lung tissue, mouse, rabbit, rat, guinea pig, 769
marine sponge, 470
methylation, rat liver microsomes, effects of pyridoxine deficiency, 409
mice, lung, surfactants, 548
neutrophils, human, incorporation of docosahexaenoic acid, 324
rabbit alveolar macrophages, incorporation of labeled glycerol and palmitoyl glycerophosphocholine, 155
rat brain, fatty acid content, GC, 697
rat lung, choline incorporation, effect of chlorphentermine, 230
stimulation of alkylglycerol monooxygenase in rat liver microsomes, 191
synthesis in rabbit lung, effect of fatty acids, 724
PHOSPHOLIPID METABOLITES, effect on ADH activity of toad bladder, 596
PHOSPHOLIPIDS, POLYENOIC, molecular species, quantitation by HPLC, 356
PHYTOSTEROL, effect on host plant utilization by cactophilic *Drosophila*, 92
synthesis, relationship to hydroxymethylglutaryl-CoA reductase, 82
PHYTOSTEROLEMIA, plasma steryl esters, fatty acid composition, 371
PICOLINYL ESTERS, fatty acids of pig testis and cod liver oil, GC-MS, 657
PIG, boar sperm, acrosome membrane, lipid composition, 566
testis, pyrrolidide and picolinyl derivatives of fatty acids, GC-MS, 657
PLASMA, human, adsorption and distribution of octadecenoic acid, 589
rat, phospholipid composition, effect of diet, GLC, 652
PLASMA MEMBRANE, hepatocyte, rat, acyl-CoA synthetase, 571
PLASMA, STERYL ESTERS, fatty acid composition in patients with phytosterolemia, 371

PLASMALOGEN, model for oxidation, effect of unsaturated esters, 648
PLATELET-ACTIVATING FACTOR, phospholipase C, rabbit liver, 776
PNEUMONAL SURFACTANTS, mice lung, effect of methylnaphthalene, 548
POLYCHLORINATED BIPHENYLS, treated rats, clofibrate effects on cholesterol metabolism, 159
POLYPHOSPHOINOSITIDES, rat, kidney, nutritional effects on levels, 226
POLYUNSATURATED FATS, content in Aboriginal diet, 684
POLYUNSATURATED FATTY ACIDS, lung tissue, phospholipids, 769
PRAIRIE DOG, cholesterol gallstones, effect of bile acid on dissolution, 575
PROSTAGLANDIN-LIKE SUBSTANCES, autoxidation products of methyl linolenate, 553
PROTEINS, malondialdehyde crosslinking reactions, 6
PROTOZOA, desaturation of fatty acids in Trypanosoma, 718
PURINES, effect on lecithin, cholesteryl acyltransferase, 531
PYRIDOXINE, deficiency, effects on phospholipid methylation, 409
PYROPHOSPHATIDIC ACID, content in mushroom, 666
PYRROLIDIDE ESTERS, fatty acids of pig testis and cod liver oil, GC-MS, 657

Q

QUAIL, intestine, cerebrosides, HPLC, 710

R

RABBIT, alveolar macrophages, phospholipids, dipalmitoyl species, 155
liver, phospholipase C, platelet-activating factor, 776
lung, microsomes, cholinephosphotransferase, 498
lung, synthesis of PC and PG, palmitic acid, 724
lung tissue, lipid peroxide levels, 769
tissue sterol content, effect of cholesterol and cholestyramine, 738
RADIOACTIVE LABELING, glycerol and palmitoyl glycerophosphocholine, use in study of biosynthesis of dipalmitoyl species of diacyl glycerophosphocholine in rabbit alveolar macrophages, 155
linoleate, autoxidized, distribution in rat tissue, 150
RAT, adipose tissue, glycerolipid biosynthesis, 460
adrenal gland, fatty acid desaturation, effects of epinephrine, 401
blood and liver, vitamin A and E distribution, 465
brain, α-tocopherol content, effect of diet and age, 786
brain lipids, fatty acid composition, effect of linolenate, 697
carcass lipids, linoleic acid retention, dietary effect of essential fatty acids, 121
cardiovascular responses to stress, effects of essential fatty acids, 139
effect of rice bran oil upon hypocholesterolemia, 715
essential fatty acids and vitamin E deficiency, 603
fecal excretion and intestinal adsorption of oxysterol, 744
heart triacylglycerol hydrolase, stimulation by phosphatidylethanolamine and lysophosphatidylethanolamine, 1
hepatocytes, diacyl glycerophosphocholine, 634
hepatocytes, fatty acid composition, effect of nutrition, 454
hepatocytes, fatty acid synthesis, stimulation by 4β-phorbol-12-myristate-13-acetate, 366
hepatocytes, plasma membrane, acyl-CoA synthetase, 571
hepatocytes and hepatoma cells, arachidonate biosynthesis, blockage by dexamethasone, 212
hypertension, blood pressure, effect of diet, 753
hypophysectomized, acyl-CoA synthetases, HPLC measurement, 11
kidney, polyphosphoinositide pools, effects of pre- and postweaning undernutrition, 226
liver, cholesteryl ester hydrolase, triglyceride lipase, 503
liver, effect of cholesterol and cholate, 475
liver, fatty acid composition, effect of nutrition, 454
liver, ganglioside composition, extracellular fluid viscosity, 629
liver, ketogenesis, effect of diet, 508
liver, lysosomes, cholesteryl ester hydrolase, 481
liver, metabolism of [1-^{14}C]erucic acid, influence of dietary fat, 395
liver, microsomal fatty acyl-CoA synthetase activity, substrate specificity and size, effects of Triton X-100, 328
liver microsomes, Δ^6 desaturase, effect of malonyl-CoA, 721
liver, microsomes, Δ^6 desaturase, effect of estradiol and temperature, 440
liver, microsomes, Δ^9 desaturation, fatty acid composition, 425
liver, microsomes, alkylglycerol monooxygenase, phospholipid requirements, 191
liver, microsomes, phospholipid methylation, effects of pyridoxine deficiency, 409
liver and plasma, phospholipids, effect of diet, GLC, 652
liver and serum lipids, effect of histidine and cholesterol, 748
liver cells, essential fatty acids, desaturation and chain elongation, 202
liver mitochondria, effect of growth hormone on phospholipids, 677
lung phospholipids, choline uptake, effect of chlorphentermine, 230
lung tissue, lipid peroxide levels, 769
major organs, dolichyl phosphate and dolichol quantitation during aging, 353
mammary tumorigenesis, dietary effects of polyunsaturated fats, 285
mammary tumorigenesis, dietary effects of lard and antioxidants, 275
Morris hepatoma 7777, sphingomyelin, 529
pancreas, azaserine-induced foci, dietary effects of fats, 281
PCB-treated cholesterol metabolism, effects of clofibrate, 159
plasma, effect of purines on lecithin, 531
small intestinal mucosa, distribution of glycosphingolipids and ceramide, 112
tissue, distribution of lipid oxidation products, radioactive labeling study, 150
tissue, fatty acid methyl esters, gas liquid chromatographic measurement, 21
tissue, ω6 and ω3 fatty acids, effects of linoleic acid–rich total parenteral nutrition, 132
Zucker, insulin release and lipid metabolism, dietary effects of triolein and sunflower oil, 220
REDUCTASE, 2,4-DIENOYL CoA, rat hepatocytes, effect of diet, 508
RETINOL, subcellular distribution in chick liver fed β-carotene, 164
REYE'S SYNDROME, mouse model, serum lipid abnormalities, 378
RHINITIS, allergic, human, alteration of arachidonic acid content in polymorphonuclear and mononuclear cells, 17
RICE BRAN OIL, effect upon hypocholesterolemia in rat, 715
RUMINANTS, very low density lipoproteins and chylomicrons, hydrolysis by lipoprotein lipase, 252

S

SACCHAROMYCES CEREVISIAE, absorption of sterols, evidence for facilitated transport, 102
SALMO SALAR, smolting hatchery-fed and wild, comparison of fatty acids and lipids, 117
SALMON, smolting, hatchery-fed and wild, comparison of fatty acids and lipids, 117
SARCOMA, K3T3, glycosphingolipid metabolism, vitamin E, 643
SEA LILIES, fatty acid profile, 430
SEA URCHIN, fatty acid composition, olefinic acids, GLC, 558
SEEDS, *Cuphea lutea*, lipid biosynthesis, 143
isoricinoleic acid composition, 486
SELENIUM, effect on α-tocopherol content of rat brain, 786
SERUM, lipid, rat, effect of histidine and cholesterol, 748
lipoprotein lipids, action of phenyl-piperidine diones, mouse, 617
SIDE CHAIN MOBILITY, acyl groups, PC, multilamellar vesicles, 691
SINAPIS ALBA, developing seeds, elongation of fatty acids, 347
SMALL INTESTINE, human, cholesterol synthesis, bile acids, 759

SORGHUM, seeds, sterols, chromatographic and spectral characteristics, 69
sterols, composition and biosynthesis, 69
SOYBEAN, seedlings, ω-hydroxylase activity, 780
sterols, composition during the life cycle, 48
SPECTRA, ^{13}C-NMR, fatty acids of sea urchin, 558
SPECTRA, ABSORBANCE, hydroperoxides, hemoglobin peroxidase, 792
SPECTRA, FLUORESCENCE, water pool of lecithin reverse micelles, 764
SPECTRA, GC-MS, lipids of *Wrightia* seeds, 486
SPECTRA, IR, autoxidation products of methyl linolenate, 553
isolation of pyrophosphatidic acid, 666
water pool of lecithin reverse micelles, 764
SPECTRA, MASS, autoxidation products of methyl linolenate, 553
4-desmethylsterols of Caryophyllaceae, 754
fast atom bombardment of PC and PS, 580
fatty acid derivatives of glyceryl ethers, 518
fatty acids of pig testis and cod liver oil, GC-MS, 657
GLC, fatty acid profile, marine invertebrates, 430
GLC, fatty acids of sea urchin, 558
phenolic acetates, 518
pigments from TBA reaction with aldehydes, 537
sterols, banana
sterols in cucumber, 491
sterols in Cucurbitaceae, 515
triglycerides, beetle exoskeleton, 434
SPECTRA, NMR, bacterial fatty acids, 669
pigments from TBA reaction with aldehydes, 537
SPECTRA, UV-VISIBLE, pigments from TBA reaction with aldehydes, 537
water pool of lecithin reverse micelles, 764
SPECTROMETRY, MASS, chemical ionization, oxidation products of methyl linoleate and linolenate, 333
determination of iso- and anteiso- fatty acids, 362
SPERM, plasma and acrosomal membrane, lipid composition, 566
SPERMATIDS, rat, acyl-CoA synthetases, HPLC measurement, 11
SPHINGOID, composition in sphingomyelin, rat hepatoma, 529
SPHINGOMYELIN, sphingoid composition, rat hepatoma, 529
SPONGE, 5,9-hexadecadienoic acid, 470
SQUALANE-2,3-EPOXIDE CYCLASE, use as a model for the development of new drugs, 31
SQUASH, sterols, composition during the life cycle, 48
STEARIC ACID, synthesis of PC and PG in rabbit lung, 724
STEROIDS, *Manduca sexta*, ovaries and eggs, 76
STEROL, absorption by *Saccharomyces cerevisiae*, facilitated sterol absorption, 102
banana, GC-MS, 494
biosynthesis, fungal, ergosterol as a growth factor, 89
biosynthesis, higher plants, study using high energy intermediate analogues, 52
biosynthesis, inhibitors in higher plants, 52
biosynthesis in *Zea mays*, 63
content in cucumber, 491
Cucurbitaceae, configurations at C-24, 39
Cucurbitaceae, content and composition, 39
Cucurbitaceae, GC-MS, 515
effect upon polarity of vesicle surfaces, 691
honey bee, selective transfer, 97
metabolism, Mexican bean beetle, 639
rabbit tissues, effect of cholesterol and cholestyramine, 738
sorghum, composition and biosynthesis, 69
sorghum seeds, chromatographic and spectral characteristics, 69
soybean and squash, composition during the life cycle, 48
STIGMASTEROL, metabolism in Mexican bean beetle, 639
SUNFLOWER OIL, dietary, effects on insulin release and lipid metabolism, 220
SURFACTANTS, mice, lung, effect of methylnaphthalene, 548
SWINE FLU, vaccine, lipids, 342

T

TAUROCHOLATE, effect on cholesteryl ester hydrolase, 481
TEMPERATURE, effect on Δ^6 desaturase, rat liver, 440
THIOBARBITURIC ACID, lung tissue, rat, rabbit, mouse, 769
reaction with aldehydes, 537
TISSUE LIPIDS, human, 543
TOAD, antidiuretic hormone activity, effect of phospholipids, 596
TOBACCO HORNWORM, ovaries and eggs, the fate of radiolabeled steroids, 76
TOTAL PARENTERAL NUTRITION, linoleic-rich, effect on rat tissue fatty acids, 132
TRANS-3,*CIS*-5-TETRADECADIENOIC ACID, synthesis of, 662
TRIACYLGLYCEROLS, goat milk, 183
hamster fibroblasts, cyclic AMP, 525
metabolism, effect of paramyxovirus, 608
TRIACYLGLYCEROL HYDROLASE, rat heart, stimulation by phosphatidylethanolamine and lysophosphatidylethanolamine, 1
TRIGLYCERIDES, adsorption and distribution in human plasma and lipoprotein lipids, human, 589
beetle, exoskeleton, fatty acid profile, GLC, 434
hepatic synthesis in mouse, effect of phenylpiperidine diones, 617
rat alveolar macrophages, fatty acid transfer, 623
TRIGLYCERIDE LIPASE, rat liver, 503
TRIOLEIN, dietary, effects on insulin release and lipid metabolism, 220
TROUT, liver cells, essential fatty acids, desaturation and chain elongation, 202
TRYPANOSOMA, see protozoa, 718
TUMORIGENESIS, colon epithelium, pathology, effect of dietary components, 289
mammary, rat, dietary effects of polyunsaturated fats, 285
rat, mammary, dietary effects of lard and antioxidants, 275

V

VACCINES, lipid content, 342
VEGETABLE FATS, effect upon blood pressure in hypertensive rats, 753
VEGETABLE OILS, effect on ketogenesis in rat hepatocytes, 508
VITAMIN A, rat blood and liver, 465
VITAMIN E, deficiency in rat, relationship to essential fatty acids, 603
effect on α-tocopherol content of rat brain, 786
glycosphingolipid metabolism, reticulum sarcoma, 643
lung tissue, rat, rabbit, mouse, 769
rat blood and liver, 465

W

WATER POOL, lecithin reverse micelles, spectral analysis, 764
WRIGHTIA, isoricinoleic acid in seeds, 486

X

XANTHOMATOSIS, in conjunction with phytosterolemia, plasma steryl esters, fatty acid composition, 371

Y

YEAST, ergosterol-derived growth factor, 89
Saccharomyces cerevisiae, facilitated sterol absorption, 102

Z

ZEA MAYS, sterol biosynthesis, 63

Lipids (ISSN:0024-4201) is published monthly by the American Oil Chemists' Society at 41 East University Avenue, Champaign, IL 61820. Annual subscription rate for AOCS U.S. members is $20.00, for non-U.S. members $30.00. Nonmember subscriptions are $50.00 for one year or $139.00 for three years; there is also an additional postage charge of $15.00 per year for nonmember subscriptions from foreign countries. Optional air mail delivery is $60.00 per year. Second-class postage paid at Champaign, IL, and additional mailing offices. POSTMASTER: Send address changes to P.O. Box 5037, Station A, Champaign, IL 61820. The American Oil Chemists' Society and the Editor of *Lipids* cannot assume responsibility for statements and opinions advanced by contributors.

Editorial information. Current instructions to authors are printed in *Lipids*, Vol. 21, pp. i-iv (January 1986). Manuscripts intended for publication should be submitted, in quadruplicate, to the Editor, Wolfgang J. Baumann, at the Hormel Institute. Correspondence regarding manuscripts in the reviewing process should be directed to the Editorial Assistant. Correspondence concerning page proofs should be addressed to the Managing Editor, G. Willhite, at the AOCS office. Page charges of $55.00 per printed page may be paid for papers published in *Lipids;* payment of page charges will not affect review and publication of papers.

Correspondence concerning new subscriptions, subscription renewals, changes of address and claims for missing issues should be addressed to Circulation Department, *Lipids,* American Oil Chemists' Society, P.O. Box 5037, Station A, Champaign, IL 61820. Requests for changes of address must include both old and new addresses, including zip codes, and a recent mailing label; notices must be received 30 days before the date of issue. Claims for missing issues must be received by the Circulation Department within 30 days (90 days for foreign subscriptions).

Lipids

Contents
Volume 21 (1986)

i–iv *Lipids* Guide for Authors

v Editorial

1–5 **Stimulation of a Neutral Triacylglycerol Hydrolase from Rat Heart by Phosphatidylethanolamine and Lysophosphatidylethanolamine**
D.L. Severson and B. Hurley

6–10 **The Chemistry of Lipid Peroxidation Metabolites: Crosslinking Reactions of Malondialdehyde**
V. Nair, C.S. Cooper, D.E. Vietti and G.A. Turner

11–16 **HPLC Measurement of Testicular Long Chain Acyl-CoA Synthetases with Different Substrate Specificities**
W.M. Grogan and E.G. Huth

17–20 **Altered Arachidonic Acid Content in Polymorphonuclear and Mononuclear Cells from Patients with Allergic Rhinitis and/or Asthma**
R.E. Rocklin, L. Thistle, L. Gallant, M.S. Manku and D. Horrobin

21–25 **Measurement of the Incorporation of Orally Administered Arachidonic Acid into Tissue Lipids**
R.J. Kulmacz, M. Sivarajan and W.E.M. Lands

Chemistry Biosynthesis and Function of Sterols
Papers from the H.W. Kircher Memorial Symposium presented at the 76th AOCS Annual Meeting in Philadelphia, Pennsylvania, May 1985

26 **In Remembrance of Henry Kircher**
W. Sucrow

27–30 **Oxysterols: Chemical Synthesis, Biosynthesis and Biological Activities**
E.J. Parish, V.B.B. Nanduri, H.H. Kohl and F.R. Taylor

31–38 **The Squalene-2,3-Epoxide Cyclase as a Model for the Development of New Drugs**
L. Cattel, M. Ceruti, F. Viola, L. Delprino, G. Balliano, A. Duriatti and P. Bouvier-Navé

39–47 **Sterols of Cucurbitaceae: The Configurations at C-24 of 24-Alkyl-Δ^5-, Δ^7- and Δ^8-Sterols**
T. Akihisa (ne Itoh), S. Thakur, F.U. Rosenstein and T. Matsumoto

48–51 **Sterol Composition During the Life Cycle of the Soybean and the Squash**
G.P. Fenner, G.W. Patterson and P.M. Koines

52–62 **Design of High Energy Intermediate Analogues to Study Sterol Biosynthesis in Higher Plants**
A. Rahier, M. Taton, P. Bouvier-Navé, P. Schmitt, P. Benveniste, F. Schuber, A.S. Narula, L. Cattel, C. Anding and P. Place

63–68 **Biosynthesis of 24-Methylcholest-5-en3β-ol and 24-Ethylcholest-5-en-3β-ol in *Zea mays***
N. Rendell, N.L.A. Misso and L.H. Goad

69–75 **Sterol Composition and Biosynthesis in Sorghum: Importance to Developmental Regulation**
R.C. Heupel, Y. Sauvaire, P.H. Le, E.J. Parish and W.D. Nes

76–81 **The Fate of Radiolabeled Steroids in Ovaries and Eggs of the Tobacco Hornworm, *Manduca sexta***
M.J. Thompson, J.A. Svoboda, M.F. Feldlaufer and R. Lozano

82–88 **Hydroxymethylglutaryl-CoA Reductase, a Key Enzyme in Phytosterol Synthesis?**
T.J. Bach

89–91 **An Essential Fungal Growth Factor Derived from Ergosterol: A New End Product of Sterol Biosynthesis in Fungi?**
L.W. Parks, R.J. Rodriguez and C. Low

92–96 **The Role of Phytosterols in Host Plant Utilization by Cactophilic *Drosophila***
J.C. Fogleman, S.M. Duperret and H.W. Kircher

97–101 **Selective Sterol Transfer in the Honey Bee: Its Significance and Relationship to Other Hymenoptera**
J.A. Svoboda, E.W. Herbert Jr., M.J. Thompson and M.F. Feldlaufer

102–106 **Evidence for Facilitated Transport in the Absorption of Sterols by *Saccharomyces cerevisiae***
W.R. Nes, I.C. Dhanuka and W.J. Pinto

107–111 **Distribution of Glycosphingolipids of Monkey Small and Large Intestinal Mucosa**
R. Dahiya, M.D. Brown and T.A. Brasitus

112–116 **Distribution of Glycosphingolipids and Ceramide of Rat Small Intestinal Mucosa**
R. Dahiya and T.A. Brasitus

117–120 **Comparison of Fatty Acids and Lipids of Smolting Hatchery-Fed and Wild Atlantic Salmon *Salmo salar***
R.G. Ackman and T. Takeuchi

121–126 **Retention of Linoleic Acid in Carcass Lipids of Rats Fed Different Levels of Essential Fatty Acids**
W. Becker and Å. Bruce

127–131 **Formation of Complexes Between Lecithin and Apovitellenin I, An Avian Egg-Yolk Apoprotein**
K. Fretheim, R.W. Sleigh and R.W. Burley

132–138 **Effect of Total Parenteral Nutrition with Linoleic Acid-Rich Emulsions on Tissue ω6 and ω3 Fatty Acids in the Rat**
S.M. Innis

139–142 **Effects of Essential Fatty Acid Administration on Cardiovascular Responses to Stress in the Rat**
D.E. Mills and R.P. Ward

143–149 **Acetate and Mevalonate Labeling Studies with Developing *Cuphea lutea* Seeds**
S.S. Singh, T.Y. Nee and M.R. Pollard

150–154 **Distribution of ^{14}C after Oral Administration of (U-^{14}C)Labeled Methyl Linoleate Hydroperoxides and Their Secondary Oxidation Products in Rats**
M. Oarada, T. Miyazawa and T. Kaneda

155–158 **Synthesis of the Dipalmitoyl Species of Diacyl Glycerophosphocholine by Rabbit Alveolar Macrophages**
Y. Nakagawa and K. Waku

159–163 **Effect of Clofibrate on Cholesterol Metabolism in Rats Treated with Polychlorinated Biphenyls**
M. Nakagawa, T. Shimokawa, A. Noguchi, N. Ishihara and S. Kojima

164–169 **Subcellular Distribution of Dietary β-Carotene in Chick Liver**
S.T. Mayne and R.S. Parker

170–174 **A Method for Isolation of Milk Fat Globules**
S. Patton and G.E. Huston

175–177 **Localization of Fatty Acid Double Bonds by Gas Chromatography of Intermediate Aldehydes as 1,3-Dioxane**
G. Lakshminarayana and D.G. Cornwell

178–181 **Two Geometrical Isomers of Linoleic Acid: Improved Total Syntheses**
T. Otsuki, R.F. Brooker and M.O. Funk

183–190 **Comparative Study of the Molecular Species of Chloropropanediol Diesters and Triacylglycerols in Milk Fat**
A. Kuksis, L. Marai, J.J. Myher, J. Cerbulis and H.M. Farrell Jr.

191–194 **Phospholipid Requirement of Alkylglycerol Monooxygenase from Rat Liver Microsomes**
T. Ishibashi and K. Seyama

195–201 **Brown Adipose Tissue Triacylglycerol Fatty Acids of Obese and Lean Mice: In Situ and in Transplants**
J.L. Roberts, M. Ashwell and M. Enser

202–205 **Desaturation and Chain Elongation of Essential Fatty Acids in Isolated Liver Cells from Rat and Rainbow Trout**
T-A. Hagve, B.O. Christophersen and B.H. Dannevig

206–211 **Properties of Diacylglycerol Kinase Purified from Bovine Brain**
C-H. Lin, H. Bishop and K.P. Strickland

212–219 **Dexamethasone Blocks Arachidonate Biosynthesis in Isolated Hepatocytes and Cultured Hepatoma Cells**
C.A. Marra, M.J.T. de Alaniz and R.R. Brenner

220–225 **Effects of Dietary Triolein and Sunflower Oil on Insulin Release and Lipid Metabolism in Zucker Rats**
T.E.C. Weekes, K.W.J. Wahle and M.B. Lebaijuri

226–229 **Effects of Pre- and Postweaning Undernutrition on Polyphosphoinositide Pools in Rat Kidney**
U.S. Ananth, C.V. Ramakrishnan and G. Hauser

230–234 **Effect of Chlorphentermine on Incorporation of (^{14}C)Choline in the Rat Lung Phospholipids**
K. Gonmori, T. Morita and H.M. Mehendale

235–238 **Partial Specific Volume and Preferential Hydration of Low Density Lipoprotein Subfractions**
T.S. Kahlon, G.L. Adamson, L.A. Glines, J.R. Orr and F.T. Lindgren

239–240 **Complete Separation of Phospholipids from Human Heart Combining Two HPLC Methods**
P. Juaneda and G. Rocquelin

241–246 **Practical Liquid Chromatographic Separation of the Phenols in Technical Cashew Nutshell Liquid from *Anacardium occidentale***
S.K. Sood, J.H.P. Tyman, A. Durrani and R.A. Johnson

247–251 **Simultaneous Analysis of Low Plasma Levels of Deuterium-Labeled Saturated and Unsaturated Fatty Acids as *t*-Butyldimethylsilyl Esters**
H. Parsons, E.M. Emken, L. Marai and A. Kuksis

252–263 **The Hydrolysis of Very Low Density Lipoproteins and Chylomicrons of Intestinal Origin by Lipoprotein Lipase in Ruminants**
W.W. Christie, R.C. Noble and R.A. Clegg

255–260 **The Peroxidizing Effect of α-Tocopherol on Autoxidation of Methyl Linoleate in Bulk Phase**
J. Terao and S. Matsushita

261–266 **Enzymic Oxidation of Linolenic Acid to 1,Z-5-Octadien-3-ol,Z-2,Z-5-Octadien-1-ol and 10-Oxo-E-8-decenoic Acid by a Protein Fraction from Mushrooms (*Psalliota bispora*)**
M. Wurzenberger and W. Grosch

267–270 **Separation of Underivatized Gangliosides by Ion Exchange High Performance Liquid Chromatography**
M.M. Whalen, G.C. Wild, W.D. Spall and R.J. Sebring

Lipids and Cancer
Papers from the Brian L. Walker Memorial Symposium presented at the 76th AOCS Annual Meeting in Philadelphia, Pennsylvania, May 1985

271 **In Remembrance of Brian L. Walker**
H.H. Draper

272–274 **Calories, Fat and Cancer**
D. Kritchevsky, M.M. Weber, C.L. Buck and D.M. Klurfeld

275–280 **Mammary Tumorigenesis in Rats Fed Diets High in Lard**
A.E. Rogers, B. Conner, C. Boulanger and S. Lee

281–284 **Effects of High Levels of Dietary Fats on the Growth of Azaserine-Induced Foci in the Rat Pancreas**
B.D. Roebuck

285–288 **Dietary Polyunsaturated Fat in Relation to Mammary Carcinogenesis in Rats**
L.M. Braden and K.K. Carroll

289–291 **Effect of Dietary Components on the Pathobiology of Colonic Epithelium: Possible Relationship with Colon Tumorigenesis**
R.P. Bird

292–300 **A Comparison of Lipids from Liver and Hepatoma Subcellular Membranes**
R. Wood, G.C. Upreti and R.J. deAntueno

301–304 **Ether Lipid Derivatives: Antineoplastic Activity in Vitro and the Structure-Activity Rela-**

tionship
W.E. Berdel, D.D. Von Hoff, C. Unger, H.D. Schick, U. Fink, A. Reichert, H. Eibl and J. Rastetter

305–307 **The Metabolism of Malondialdehyde**
H.H. Draper, L.G. McGirr and M. Hadley

309–314 **Stereospecific Analysis of Fatty Acid Esters of Chloropropanediol Isolated from Fresh Goat Milk**
J.J. Myher, A. Kuksis, L. Marai and J. Cerbulis

315–323 **Mitochondrial Membrane Fatty Acid Composition in the Marmoset Monkey Following Dietary Lipid Supplementation**
E.J. McMurchie, R.A. Gibson, J.S. Charnock and G.H. McIntosh

324–327 **Acylation of Docosahexaenoic Acid into Phospholipids by Intact Human Neutrophils**
J-S. Tou

328–332 **Change of Substrate Specificity of Rat Liver Microsomal Fatty Acyl-CoA Synthetase Activity by Triton X-100**
K. Nagamatsu, S. Soeda and Y. Kishimoto

333–337 **Chemical Ionization-Mass Spectrometry of Secondary Oxidation Products from Methyl Linoleate and Linolenate**
E.N. Frankel, W.E. Neff and R.D. Plattner

338–341 **Influence of Dietary Fiber on Lipids and Aortic Composition of Vervet Monkeys**
D. Kritchevsky, L.M. Davison, G.T. Goodman, S.A. Tepper and D. Mendelsohn

342–346 **Lipid Content of Swine Influenza and Other Vaccines**
K.C. Leskawa, E.L. Hogan, S. Dasgupta, J-L. Chien, R.E. Erwin and S.W. Brostoff

347–352 **Elongation of (n-9) and (n-7) *cis*-Monounsaturated and Saturated Fatty Acids in Seeds of *Sinapis alba***
K.D. Mukherjee

353–355 **Quantitation of Dolichyl Phosphate and Dolichol in Major Organs of the Rat as a Function of Age**
R.K. Keller and S.W. Nellis

356–361 **Quantitative Analysis of Polyenoic Phospholipid Molecular Species by High Performance Liquid Chromatography**
H. Takamura, H. Narita, R. Urade and M. Kito

362–365 **Fast Atom Bombardment and Tandem Mass Spectrometry for Determining Iso- and Anteiso- Fatty Acids**
N.J. Jensen and M.L. Gross

366–367 **Stimulation of Fatty Acid Synthesis by 4β-Phorbol-12-Myristate-13-Acetate in Isolated Rat Hepatocytes**
T. Nomura, M. Tachibana, H. Nomura and Y. Hagino

368 **Errata**

371–377 **Fatty Acid Composition of Individual Plasma Steryl Esters in Phytosterolemia and Xanthomatosis**
A. Kuksis, J.J. Myher, L. Marai, J.A. Little, R.G. McArthur and D.A.K. Roncari

378–382 **Serum Lipid Abnormalities in a Chemical/Viral Mouse Model for Reye's Syndrome**
M.G. Murphy, L. Archambault-Schertzer, R.G. Ackman and J.F.S. Crocker

383–387 **Autoxidation of Cholesterol in Tallows Heated under Deep Frying Conditions: Evaluation of Oxysterols by GLC and TLC-FID**
J. Bascoul, N. Domergue, M. Olle and A. Crastes de Paulet

388–394 ***cis*-Vaccenic Acid in Mango Pulp Lipids**
A. Shibahara, K. Yamamoto, T. Nakayama and G. Kajimoto

395–400 **Influence of Dietary Fat on Metabolism of (14-^{14}C)Erucic Acid in the Perfused Rat Liver. Distribution of Metabolites in Lipid Classes**
G. Holmer and R. Rönneberg

401–404 **Effect of Epinephrine on the Oxidative Desaturation of Fatty Acids in the Rat Adrenal Gland**
E.C. Mandon, I.N.T. de Gomez Dumm and R.R. Brenner

405–408 **Mechanism of Anesthesia: The Potency of Four Derivatives of Octane Corresponds to their Hydrogen Bonding Capacity**
H. Brockerhoff, S. Brockerhoff and L.L. Box

409–412 **Effect of Pyridoxine Deficiency on Phospholipid Methylation in Rat Liver Microsomes**
G. Loo and J.T. Smith

413–416 **High Performance Liquid Chromatographic Separation of Monoacylglycerol Enantiomers on a Chiral Stationary Phase**
Y. Itabashi and T. Takagi

417–419 **Plasma Membrane Lipids of Bovine Adrenal Chromaffin Cells**
A.N. Malviya, M.M. Gabellec and G. Rebel

420–421 **Diurnal Rhythm of HMG CoA Reductase Activity in Canine Intestine Is Independent of Luminal Contents**
R.L. Gebhard, C.E. Sievert and W.F. Prigge

425–429 **Effect of Different Acids with Δ9,12-Dienoic Structures on Δ9 Desaturation Activity in Rat Liver Microsomes**
M.J.T. de Alaniz, I.N.T. de Gomez Dumm and R.R. Brenner

430–433 **Fatty Acids in Crinoidea and Ophiuroidea: Occurrence of All-*cis*-6,9,12,15,18,21-tetracosahexaenoic Acid**
T. Takagi, M. Kaneniwa and Y. Itabashi

434–439 **Analysis of Exoskeleton Triglycerides of *Leptinotarsa decemlineata* Say**
E. Dubis, J. Poplawski, J.T. Wrobel, J. Kusmierz, E. Malinski and J. Szafranek

440–443 **Effects of Estradiol and Environmental Temperature Changes on Rat Liver Δ6 Microsomal Desaturase Activity**
S. Gonzalez, A.M. Nervi and R.O. Peluffo

444–446 **A Liquid Crystalline Phase in Human Intestinal Contents During Fat Digestion**
P.R. Holt, B.M. Fairchild and J. Weiss

447–453 **Metabolism and Incorporation into Glycerolipids of Exogenous 18:3(n-3) and 18:3-(n-6) by MDCK Cells**
R.D. Lynch, J. Locicero and E.E. Schneeberger

454–459 **Effect of Nutritional Status on the Fatty Acid Composition of Rat Liver and Cultured Hepatocytes**
G.J. Nelson, D.S. Kelley and J.E. Hunt

460–464 **Glycerolipid Biosynthesis in Rat Adipose Tissue. Influence of Age and Cell Size on**

Substrate Utilization
S.C. Jamdar, L.J. Osborne and G.N. Wells

465–469 **Distribution of Vitamins A and E in Blood and Liver of Rats Depleted of Vitamin A or Vitamin E**
S.T. Omaye and F.I. Chow

470–471 **Identification of 5,9-Hexadecadienoic Acid in the Marine Sponge *Chondrilla nucula***
N.M. Carballeira and L. Maldonado

475–480 **A High Cholesterol/Cholate Diet Induced Fatty Liver in Spontaneously Hypertensive Rats**
K. Ueno and H. Okuyama

481–485 **Substrate Specificity of Lysosomal Cholesteryl Ester Hydrolase Isolated from Rat Liver**
R. Klemets and B. Lundberg

486–490 **Lipids Containing Isoricinoleoyl (9-Hydroxy-*cis*-12-octadecenoyl) Moieties in Seeds of *Wrightia* Species**
F. Ahmad, H. Schiller and K.D. Mukherjee

491–493 **(24*R*)-14α-Methyl-24-ethyl-5α-cholest-9(11)-en-3β-ol: A New 14α-Methylsterol from *Cucumis sativus***
T. Akihisa, N. Shimizu, T. Tamura and T. Matsumoto

494–497 **(24*S*)-14α,24-Dimethyl-9β,19-cyclo-5α-cholest-25-en-3β-ol: A New Sterol and Other Sterols in *Musa Sapientum***
T. Akihisa, N. Shimizu, T. Tamura and T. Matsumoto

498–502 **Reversibility of Cholinephosphotransferase in Lung Microsomes**
F.H.C. Tsao

503–507 **Evidence that Cholesteryl Ester Hydrolase and Triglyceride Lipase Are Different Enzymes in Rat Liver**
J.J.S. Chen, V. Rothman and S. Margolis

508–514 **The Effect of Feeding Fish Oils, Vegetable Oils and Clofibrate on the Ketogenesis from Long Chain Fatty Acids in Hepatocytes**
S. Bergseth, E.N. Christiansen and J. Bremer

515–517 **Structures of Three New 24,24-Dimethyl-Δ^7-sterols from *Gynostemma pentaphyllum***
T. Akihisa, N. Shimizu, T. Tamura and T. Matsumoto

518–524 **Mass Spectra of Fatty Acid Derivatives, of Isopropylidenes of Novel Glyceryl Ethers of Cod Muscle and of Phenolic Acetates Obtained with the Finnigan Mat Ion Trap Detector**
W.M.N. Ratnayake, A. Timmins, T. Ohshima and R.G. Ackman

525–528 **Cyclic AMP Increases Incorporation of Exogenous Fatty Acids into Triacylglycerols in Hamster Fibroblasts**
C. Mazière, J.-C. Mazière, L. Mora, M. Auclair and J. Polonovski

529–530 **Differences in the Long Chain (Sphingoid) Base Composition of Sphingomyelin from Rats Bearing Morris Hepatoma 7777**
A.H. Merrill Jr., E. Wang and P.W. Wertz

531–532 **Effects of Purines on Human and Rat Plasma Lecithin: Cholesterol Acyltransferase Activity**
M.P.T. Gillett, V.L.M. Lima and M. Chaves Filho

537–542 **Reaction of Thiobarbituric Acid with Saturated Aldehydes**
H. Kosugi and K. Kikugawa

543–547 **Distribution of Hexadecenoic, Octadecenoic and Octadecadienoic Acid Isomers in Human Tissue Lipids**
R.O. Adlof and E.A. Emken

548–552 **Accumulation of Surfactant Phospholipids in Lipid Pneumonia Induced with Methylnaphthalene**
T. Taki, T. Nakazima, Y. Emi, Y. Konishi, A. Hayashi and M. Matsumoto

553–557 **Prostaglandin-Like Substances Formed during Autoxidation of Methyl Linolenate**
T. Nakamura

558–565 **Fatty Acids in Echinoidea: Unusual *cis*-5-Olefinic Acids as Distinctive Lipid Components in Sea Urchins**
T. Takagi, M. Kaneniwa, Y. Itabashi and R.G. Ackman

566–570 **Lipid Composition of the Membrane Released After an In Vitro Acrosome Reaction of Epididymal Boar Sperm**
M. Nikolopoulou, D.A. Soucek and J.C. Vary

571–574 **Rat Hepatocyte Plasma Membrane Acyl: CoA Synthetase Activity**
B.C. Davidson and R.C. Cantrill

575–579 **A Hydrophilic Bile Acid Effects Partial Dissolution of Cholesterol Gallstones in the Prairie Dog**
B.I. Cohen, E.H. Mosbach, C.K. McSherry, B. Rzigalinski and S. Kuroki

580–588 **Fast Atom Bombardment and Tandem Mass Spectrometry of Phosphatidylserine and Phosphatidylcholine**
N.J. Jensen, K.B. Tomer and M.L. Gross

589–595 **Absorption and Distribution of Deuterium-Labeled *trans*- and *cis*-11-Octadecenoic Acid in Human Plasma and Lipoprotein Lipids**
E.A. Emken, W.K. Rohwedder, R.O. Adlof, W.J. DeJarlais and R.M. Gulley

596–602 **Inhibition of the Antidiuretic Hormone Hydroosmotic Response by Phospholipids and Phospholipid Metabolites**
N. Tarapoom, R. Royce and T. Yorio

603–607 **A Relationship Between Essential Fatty Acid and Vitamin E Deficiency**
C.S. Subramanian and J.F. Mead

608–611 **Imprints of Virus Infection: Can Paramyxoviruses Permanently Modify Triacylglycerol Metabolism?**
T.F. Wild, A. Bernard, N. Abdul Malak, G. Brichon and G. Zwinglestein

617–622 **Hypolipidemic Activity of 3- and 4-Phenylpiperidine-2,6-diones and Selected N-Substituted Derivatives**
A.R.K. Murthy, J.H. Maguire, R.S. Alphin, P.A. Day and I.H. Hall

623–628 **Transfer of Arachidonate from Phosphatidylcholine to Phosphatidylethanolamine and Triacylglycerol in Guinea Pig Alveolar Macrophages**
J.G. Nijssen, R.S. Oosting, F.P. Nÿkamp and H. van den Bosch

629–633 **Regulation of Liver Cell Ganglioside Com-**

position by Extracellular Fluid Viscosity
S. Yedgar, N. Reisfeld-Granot and B.-A. Sela

634–638 **Effect of Clofibric Acid on the Molecular Species Composition of Diacyl Glycerophosphocholine of Rat Liver Microsomes**
Y. Nakagawa, K. Waku, A. Hirose, Y. Kawashima and H. Kozuka

639–642 **New Intermediates in the Conversion of Stigmasterol to Cholestanol in the Mexican Bean Beetle**
J.A. Svoboda, C.F. Cohen, W.R. Lusby and M.J. Thompson

643–647 **Altered Metabolism and Cell Surface Expression of Glycosphingolipids Caused by Vitamin E in Cultured Murine (K3T3) Reticulum Sarcoma Cells**
G. Yogeeswaran and I.N. Mbawuike

648–651 **Oxidation of Ethyl Hexadec-1-enyl Ether, A Plasmalogen Model, in the Presence of Unsaturated Esters**
W.N. Marmer, E. Nungesser and T.A. Foglia

652–656 **The Influence of Dietary Manipulation with n-3 and n-6 Fatty Acids on Liver and Plasma Phospholipid Fatty Acids in Rats**
B.A. Nassar, Y.S. Huang, M.S. Manku, U.N. Das, N. Morse and D.F. Horrobin

657–661 **A Comparison of Pyrrolidide and Picolinyl Ester Derivatives of the Identification of Fatty Acids in Natural Samples by Gas Chromatography-Mass Spectrometry**
W.W. Christie, E.Y. Brechany, S.B. Johnson and R.T. Holman

662–665 **New Synthesis of *cis*-3, *cis*-5-Tetradecadienoic Acids, Pheromone Constituents of *Attagenus elongatulus* and *A. megatoma***
W.J. DeJarlais and E.A. Emken

666–668 **Pyrophosphatidic Acid in Mushrooms**
A. Sugai, T. Itoh, H. Kaneko, N. Kinjo and T. Muramatsu

669–671 **Fatty Acid Distribution in the Phospholipids of *Francisella tularensis***
R. Anderson and A.R. Bhatti

677–683 **Growth Hormone and Live Mitochondria: Effects on Phospholipid Composition**
S. Clejan and V.T. Maddaiah

684–690 **Animal Foods in Traditional Australian Aboriginal Diets: Polyunsaturated and Low in Fat**
J.M. Naughton, K. O'Dea and A.J. Sinclair

691–696 **Correlation of Side Chain Mobility with Cholesterol Retention by Phospholipid Vesicles**
M.K. Jacobsohn, M. Esfahani and G.M. Jacobsohn

697–701 **Effects of Dietary Linolenate on the Fatty Acid Composition of Brain Lipids in Rats**
R.H. Anding and D.H. Hwang

702–709 **Glucosylceramide and the Level of the Glucosidase-Stimulating Proteins**
S.C. Datta and N.S. Radin

710–714 **An Improved Method for the Separation of Molecular Species of Cerebrosides**
Y. Hirabayashi, A. Hamaoka, M. Matsumoto and K. Nishimura

715–717 **Rice Bran Oil and Hypocholesterolemia In Rats**
R.D. Sharma and C. Rukmini

718–720 **Desaturation of Fatty Acids in *Trypanosoma cruzi***
M.G. de Lema and E.E. Aeberhard

721–723 **Effect of Malonyl-CoA on Δ6 Desaturation Activity of Rat Liver Microsomes**
I.N.T. de Gomez Dumm, M.J.T. de Alaniz and R.R. Brenner

724–725 **Selective Use of Palmitic Acid over Stearic Acid for Synthesis of Phosphatidylcholine and Phosphatidylglycerol in Lung**
F.H.C. Tsao

731–732 **Biological Effects of Fish Oils in Relation to Chronic Diseases**
K.K. Carroll

733–737 **Comparative Study on the Blood Pressure Effects of Four Different Vegetable Fats in Young Spontaneously Hypertensive Rats**
P. Hoffmann, H.-U. Block, J. Beitz, Ch. Taube, W. Forster, P. Wortha, P. Singer, E. Naumann and H. Heine

738–743 **Effects of Cholestanol Feeding and Cholestyramine Treatment on the Tissue Sterols in the Rabbit**
M. Buchmann and O.P. Clausen

744–747 **Intestinal Absorption and Fecal Excretion of 5,6α-Epoxy-5α-Cholesta-3β-ol by the Male Wistar Rat**
J. Bascoul, N. Domergue, J. Mourot, C. Debry and A. Crastes de Paulet

748–753 **Changes in Lipids in Liver and Serum of Rats Fed a Histidine-Excess Diet or Cholesterol-Supplemented Diets**
E. Ohmura, Y. Aoyama and A. Yoshida

754–758 **Dominance of Δ-7-Sterols in the Family Caryophyllaceae**
T.A. Salt and J.H. Adler

759–763 **Regulation of Cholesterol Synthesis in Isolated Epithelial Cells of Human Small Intestine**
D.D. Sviridov, I.G. Safonova, A.G. Talalaev, V.S. Repin and V.N. Smirnov

764–768 **Spectroscopic Investigations of the Water Pool in Lecithin Reverse Micelles**
V.V. Kumar and P. Raghunathan

769–775 **Species Differences in Lipid Peroxide Levels in Lung Tissue and Investigation of Their Determining Factors**
K. Arakawa and M. Sagai

776–779 **Specific Induction of Lauric Acid ω-Hydroxylase by Clofibrate,diethyl-hexyl-phthalate and 2,4-Dichlorophenoxyacetic Acid in Higher Plants**
J-P. Salaun, A. Simon and F. Durst

780–785 **A Phospholipase C with a High Specificity for Platelet-Activating Factor in Rabbit Liver Light Mitochondria**
J. Nishihira and T. Ishibashi

786–791 **Influence of Dietary Vitamin E, Selenium and Age on Regional Distribution of α-Tocopherol in the Rat Brain**
M. Meydani, J.B. Macauley and J.B. Blumberg

792–795 **Limitations of the Method Using Peroxidase Activity of Hemoglobin for Detecting Lipid Hydroperoxides**
S.S. Shibata, J. Terao and S. Matsushita

797–809 **Annual Index**
